MEMORANDUM FOR: All CAWG Pilots

FROM: CAWG Director of Safety

SUBJECT: FAA Wings/ FAST program
Attention: All CAWG Pilots, Flight Crew

1. In the continuing quest for safety education and improvement, the CAWG Safety Team recommends the following for CAP pilots and air crews.
2. The FAA periodically presents safety topics and related flying activities. These are usually published and mailed out to pilots, but information on this can also be found at your local FAA FSDO.
3. The FAA has also replaced its Accident Prevention Counselor program with the FAST (FAA Safety Team) program. This is a voluntary program sponsored by the FAA; it includes air carriers, maintenance personnel, as well as the general aviation community. The web tie is: <http://faasafety.gov/>
4. Pilots are also encouraged to include non-pilot air crew in these programs, and to incorporate crew resource management programs on their flights.

A handwritten signature in black ink, appearing to read "Alex C. Kay".

Alex C. Kay, MAJ., CAP
Director of Safety
California Wing
